

Junior / Apprentice Trial Workshop Saturday June 3, 2023

Led by Judge John Brock

The overall theme of the workshop is to help participants improve their trialing skills and increase their chance for qualifying in the trial. It's important for handlers to understand that trialing is not the same as training. The strategies are different and increased trialing knowledge is a key component to qualifying.

The workshop will include in-depth briefings for each level. Each workshop participant will be given the opportunity run their dog in a simulated trial environment. During the run, the handler may ask questions of the judge, take comments and recommendations, and be given ideas on how to improve their trialing skills.

At the end of the workshop a summary briefing will be held to further review rules and answer any additional questions the participants might have.
